**CPSC 491: Assignment 11**  
*Due: Tuesday, Nov 14th*

**Individual Homework.** Turn in the following:

1. Write a short description of the work you did for the project over the last week. Focus your write up on: (1) clearly describing what you set out to do for the week; (2) clearly describing what you accomplished; and (3) reflecting on what went well for you during the week (in terms of progress), what didn’t, and what you will try to do to improve your productivity or teamwork within your team.

**Project Homework.** This part should be done with your team. Work on the following as a group and hand in all work items asked for as a single copy on the due date. Your team should be starting your sixth “sprint”. At the end of the week (next Tuesday), your team must:

1. Turn in a completed task sheet from this week and an initially filled out task sheet for next week.
2. Continue to use GitHub to store all of your project documents, source code, etc.
3. Write a short description of the results of your sprint planning meeting. Your write up should include the stories you are working on, and what you will have completed (e.g., to demo) by the end of the sprint.
4. Create a short description updating me of your plans for your end-of-semester prototype. In particular, describe whether you are on track, and any changes you have made (and why). Also, check in with your advisor and sponsor about your prototype to make sure they feel that your plan is appropriate in terms of your demo. Briefly comment on their feedback as well.
