Individual Homework. Turn in the following:

1. Write a short description of the work you did for the project over the last week. Focus your write up on: (1) clearly describing what you set out to do for the week; (2) clearly describing what you accomplished; and (3) reflecting on what went well for you during the week (in terms of progress), what didn’t, and what you will try to do to improve your productivity or teamwork within your team.

Project Homework. This part should be done with your team. Work on the following as a group and hand in all work items asked for as a single copy on the due date. Your team should be doing the second week of your third “sprint”. At the end of the week (next Tuesday), your team must:

1. Turn in a completed task sheet from this week and an initially filled out task sheet for next week.
2. Continue to use GitHub to store all of your project documents, source code, etc.
3. Create a short write-up of the results of your sprint review meeting and sprint retrospective. Your write up should include the stories you worked on, the stories you completed and didn’t complete, and what you decided to “demo” for the sprint. In addition, provide the feedback you received on your work from your advisor, sponsor, and so on.
4. Drafts of Sections 4-7 of your project plan and revised versions of Sections 1-3. The bulk of this will be on writing Section 5—the initial product release plan. Bring three copies of a complete draft of your entire Project Plan to class on Tuesday.
5. Revise your major features checklist / MVP and turn it in on Tuesday.

Reading Homework. This assignment is to be done individually. Read and be prepared to answer questions on the following before next Tuesday.

1. Scrum Field Guide Ch. 31: Driving to Done through Collaboration

To help you with the readings, you should be sure to focus on and understand the following topics.

- This reading is mainly just an overview of things we’ve discussed
