CPSC 491: Assignment 7

Individual Homework. Turn in the following:

1. Write a short description of the work you did for the project over the last week. Focus your write up on: (1) clearly describing what you set out to do for the week; (2) clearly describing what you accomplished; and (3) reflecting on what went well for you during the week (in terms of progress), what didn’t, and what you will try to do to improve your productivity or teamwork within your team.

Project Homework. This part should be done with your team. Work on the following as a group and hand in all work items asked for as a single copy on the due date. Your team should be doing the first week of your fourth “sprint”. At the end of the week (next Tuesday), your team must:

1. Turn in a completed task sheet from this week and an initially filled out task sheet for next week.
2. Continue to use GitHub to store all of your project documents, source code, etc.
3. A short description of the results of your sprint planning meeting. Your write up should include the stories you decided to work on for the sprint.
4. Complete a practice presentation with your advisor. (Nothing to turn in)

Note that this week a large portion of your time will be spent on preparing your project plan and presentation. However, you should still develop a reasonable sprint goal for your project and treat the two weeks like a proper sprint.
