For this assignment, and as part of your CEDE status update presentation, you must create:

- A status report using the template provided on the course webpage
- A practice presentation
- A revised/final status presentation

Be sure to follow the template when creating your report. Your presentation should largely follow the structure of the report: planned and actual progress made since the last report, a demo of your system, a plan for the remainder of the semester, and a discussion of risks and remaining issues for your project.
