

To-Do

Lecture 13 went through the visitor implementation for a simple pretty printer (using the running example). We also went over the basics of Exam 1, which is on Wednesday (after the 3-day weekend). Be sure to do the following.

1. ***Start on HW-3.*** You have everything you need to do HW-3. You should start on it now since it is one of the harder assignments of the semester.
2. ***Study for Exam-1.*** Be sure to block out time to study for Exam 1.
3. ***Review the lecture notes.*** Be sure you can recreate the example code for the print visitor we did in class.
