

***To-Do***

Lecture 15 covered basic terminology surrounding semantic analysis (semantic checking). Be sure to do the following.

1. ***Finish up HW-3.*** HW-3 is due on Wednesday.
2. ***Review the lecture notes.*** Be sure you study and understand the terminology described in lecture 15.
3. ***Project Proposal.*** Your proposal for the CPSC 326 final project (project part 1) is due next week. You should consider what extensions you would like to work on and start your proposal. Please be sure to read over the project description and requirements as you begin working on the proposals.
