

**To-Do**

Lecture 25 covered additional code generation topics, focusing on function parameters, adding return instructions, and literals.

1. ***Continue Working on HW-5.*** You should be almost finished with HW-5, which is due this coming Friday.
2. ***Review the lecture notes.*** Be sure to look over the lecture notes and understand how both literals are translated to VM instructions and how function arguments and return values are handled. You should be able to do all of the code generation examples from the lecture notes.
