To-Do

Lecture 31 continued working through OCaml basics. Note the following.

1. **Wrap up HW-6.** You should be finishing up HW-6, which is due on Monday.

2. **Review the lecture notes.** Be sure to study the lecture notes and the examples.

3. **Install opam/ocaml.** If you haven't yet, be sure to install OCaml.

Things to Know / Do:

- The primitive types in OCaml.

- How to use if-then-else, let-bindings, let-in expressions, and how to define simple functions

- Go through each example in the lecture notes and run them in OCaml
