To-Do

Lecture 32 continued working through OCaml basics. Note the following.

1. ***Wrap up HW-6.*** You should be finishing up HW-6. The due date was extended to Wednesday.

2. ***Review the lecture notes.*** Be sure to study the lecture notes and the examples.

3. ***Install opam/ocaml.*** If you haven't yet, be sure to install OCaml.

Things to Know / Do:

- How to create lists in OCaml and how to infer the type of a list.

- Function types, and in particular, how to write function types with more than one parameter.

- What the append and cons operators (functions) do and what their types are.
