To-Do

Lecture 34 continued working through OCaml basics. Note the following.

1. **Finish HW-7.** You should be working on finishing up Part's A and B of HW-7.

2. **Review the lecture notes.** Be sure to study the lecture notes and the examples. However, the best way to study for the topics we've covered over the last week is to work on and finish HW-7.

Things to Know / Do:

- Match expressions and examples from lecture

- Matches with lists (e.g., `[]`, `x::xs`, `x::[]`, `x::y::xs` and so on).

- How to write simple list functions using match expressions include empty, length, shuffle.

- Guards and examples from lecture, including the get and grade functions from the lecture.
