

To-Do

Lecture 37 went over the basics of Answer-Set Programming and clingo. Note the following.

1. **Work on HW-8.** You have everything you need for HW-8.
2. **Review the lecture notes.** Be sure to look over the notes and make sure you understand the terms and ideas presented.

Things to Know / Do:

- The basic idea of a combinatorial optimization problem.
- The basic idea of generate-and-test (guess-and-check) algorithmic approach.
- Generally what is meant by an answer (answer set) in ASP.
